What is the UVM Autism Collaborative?

The UVM Autism Collaborative is a group of autistics, families, caregivers, researchers and clinicians working together to improve the quality of life for autistics everywhere.

Current Activities:
- Building a dedicated network of researchers, health care professionals, caregivers and autistics.
- Research projects
- Quarterly newsletter
- Virtual playgroup for children and caregivers
- Sharing autism resources

Who are the UVM Autism Collaborative?

The Collaborative consists of the Executive Committee, Steering Committee, researchers, clinicians, PhD candidates, UVM graduate & undergraduate students, caregivers/family, and autistics.

The UVM Autism Collaborative is part of the Center on Disability and Community Inclusion (CDCI) at the University of Vermont.

Our Mission:

The UVM Autism Collaborative believes that health care should be autistic-centered.

We believe that care should concentrate on the quality of life and community inclusion of autistics and their caregivers.

We wholeheartedly believe that our goals will be achieved through interdisciplinary practice.

Interdisciplinary practice translates to multiple stakeholders from many different backgrounds working together to achieve the same goals.

We strive to collaborate across disciplines and involve all stakeholders, especially autistics, their families, and friends.

Dedicated to improving the quality of life for autistics.
