Instructor: Jason Pepe, Innovation Hall 231
Phone: 656-8865
email: Jason.Pepe@uvm.edu
Office Hours: Mon, Wed 1:00-2:00 or by appointment

Materials:

- Learning Catalytics: a software extension of MasteringPhysics that will be used to deliver question and answer, tutorial, or simulation exercises
- Pocket calculator
- Smartphone, Tablet or Laptop (laptop preferred): You will need a device that can support a web browser to participate in Learning Catalytics exercises and MasteringPhysics assignments.

Course format:

- Three 50-minute meetings per week on Mondays, Wednesdays, and Fridays. Students are expected to prepare for class by completing assigned readings and pre-flight activities, including watching videos, short assignments, and/or quizzes. Selected homework problems to be completed after class will be assigned to consolidate the students’ knowledge, while balancing the additional time needed to complete the pre-class activities.

Homework:

Homework problems serve as illustrations of the course material and are essential towards consolidation of the students’ grasp of physical principles. The course outline shows the homework assignments for each chapter.
Mastering Physics Homework and Pre-Lectures:

There will be weekly Mastering Physics online homework assignments. Late Mastering Physics assignments will not be accepted. There will be no make-ups. The lowest score will be dropped from the record. In addition to the homework, a Mastering Physics pre-lecture assignment will be given each week.

Mastering Physics course identification: pepe59908

Examinations:

There will be three midterm exams based on class material, Learning Catalytics exercises, homework, and textbook material. There will also be a final exam.

Course Grades:

For each student, a score will be computed based on 100 percentage points to be distributed as follows:

- Hourly exams: $3 \times 16 = 48\%$
- MasteringPhysics/Learning Catalytics: 36\%
- Final examination: 16\%

Numerical to Letter Grade Conversion:

Letter grades will be assigned as follows:

A range = 90 - 100
B range = 80 - 89
C range = 70 – 79
D range = 60 - 69
F = below 60

Attendance:

Students are expected to attend all classes. A student's attendance record provides additional information for assessing a student's overall attitude in the course. It will be used for advising, for documentation in a letter of reference, etc. It is the student's responsibility to keep up with missed material, announcements, etc.

Excuses:

Circumstances beyond a student's control may warrant an absence. Valid excuses for such absences are notes from the academic dean, the attending physician, the team coach, the officiating clergyman, the presiding judge, the arresting officer, etc.
Missing Hourly Exams:
Missing a midterm exam will result in a score of zero unless the student has a valid excuse as defined above. A student with a valid excuse may be given a make-up exam at a time that is mutually convenient for the student and the instructor.

Missing the Final:
Missing the final examination will result in a final course grade of F unless the student has arranged with the instructor through the appropriate academic dean for an "Incomplete."

Extra Credit: Extra credit work will not be assigned for the course.

continued
# Schedule of Meetings

STUDENTS MUST READ APPROPRIATE SECTIONS BEFORE COMING TO CLASS.
